

Erzeugung von: Faschen, Fensterbankprofile, Schlusssteine, Gurtgesimse, Hauptgesimse, Säulen, Pilaster, Konsolen uvm.

Fassadenelemente

BREZINA GmbH

Stukkateurfachbetrieb

Z PROFIL

Innovativ – Leistungsstark – Zuverlässig

Unsere kleine Firmengeschichte:

1998 Ursprünglich als reines Handelsunternehmen in Wien gegründet, wurde sehr rasch klar, dass nur eine eigene Produktion die gewünschte Qualität und verlässliche Lieferzeiten garantieren können.

2003 Nach positiven absolvieren der notwendigen Befähigungsnachweise werden nun alle Stuck- und Fassadenelemente im eigenen Haus erzeugt.

2008 Aufgrund von Platzmangel und keinerlei Möglichkeiten zur Produktionsausweitung erfolgte die Übersiedlung nach 2093 Geras.

2019 Übernahme und Eingliederung der Fassadenprodukte von Z - Profil in unsere Produktion am Standort Geras. Herr Zlabinger, Besitzer von Z-Profil, wird sich Mitte des Jahres in seinem wohlverdienten Ruhestand begeben.

ZLABINGER e.U.
Erzeugung von Fassadenelementen

Stukkateurfachbetrieb Brezina GmbH
A-2093 Geras, Vorstadt 26-28 Tel: 0676/955 87 65 Fax: 02912/611 70
Email: stuck@stuck.at www.stuck.at

Jede Art der Vervielfältigung/Veröffentlichung, auch auszugsweise nur mit schriftlicher Genehmigung der Brezina GmbH

Ein Stukkateurfachbetrieb stellt sich vor

Wir zeichnen Entwürfe von Hand oder mit dem PC

modellieren die einzelnen Dekorteile in Ton, Gips etc.

bauen das Originalstück exakt nach den jeweiligen Vorgaben

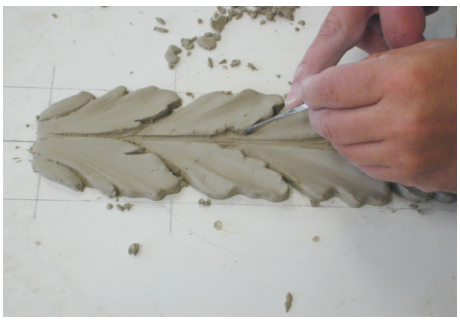

restaurieren Altteilen, bevor von diesen Gussformen für die Nachproduktion hergestellt werden

bauen die mehrteiligen Gussformen

fertigen die Abgüsse in Alabastergips oder aus Kalkmörtel, je nach den Erfordernissen und Wünschen

führen Zugarbeiten bei profilierten Stuckprofilen durch

liefern mit eigenen Fahrzeugen oder mit österreichischen Speditionen

Produkt - Infos

Profilierte Fassadenprofile

werden mittels einer CNC gesteuerten Schneidanlage aus einem Fassadenstyroporblock geschnitten.

Anschließend werden diese Rohlinge mit einer rund 3 mm elastischen weißen Armierungsschicht und einer durchgehenden Gewebeeinlage malfertig beschichtet.

Mit einem dem System angepassten Stoßkleber und Farbanstrich (bei uns erhältlich) ist eine spätere Rissbildung, selbst im Gehrungsbereich, nahezu ausgeschlossen.

2-komponenten Stoßkleber

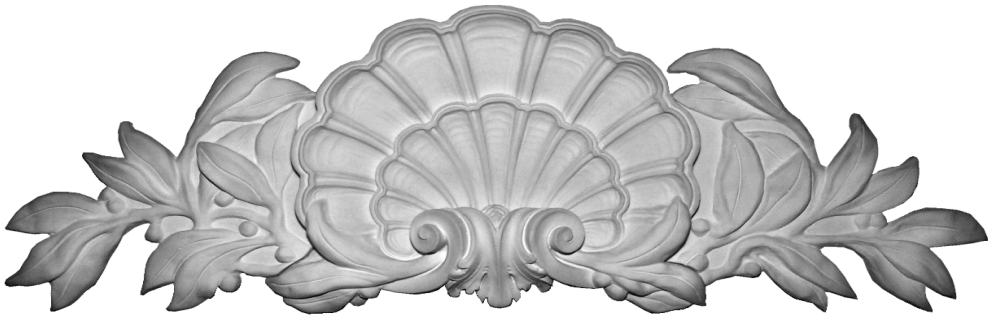

zur Verklebung der Stöße und Gehrungen

Elastische Farbe

zum Überstreichen der Fassadenprofile

Gussteile

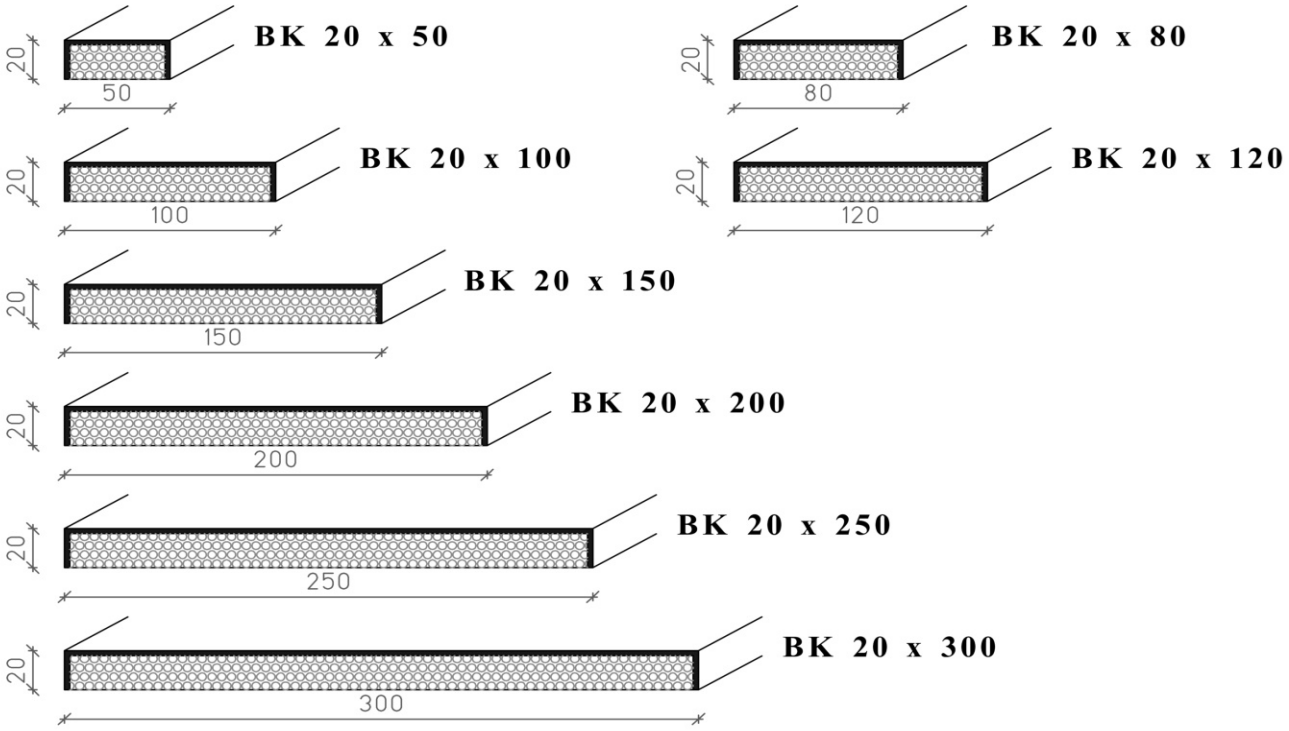

fertigen wir aus einem speziell für diesen Zweck entwickelten Kalkmörtel oder aus etwas günstigeren Zementmörtel.

Kalkmörtel wurde früher in weiten Teilen Europas, vor der Verdrängung durch den Portlandzement, für vielseitige Arbeiten an Fassaden, Statuen und Denkmälern eingesetzt und hat sich bereits über Jahrhunderte bewährt.

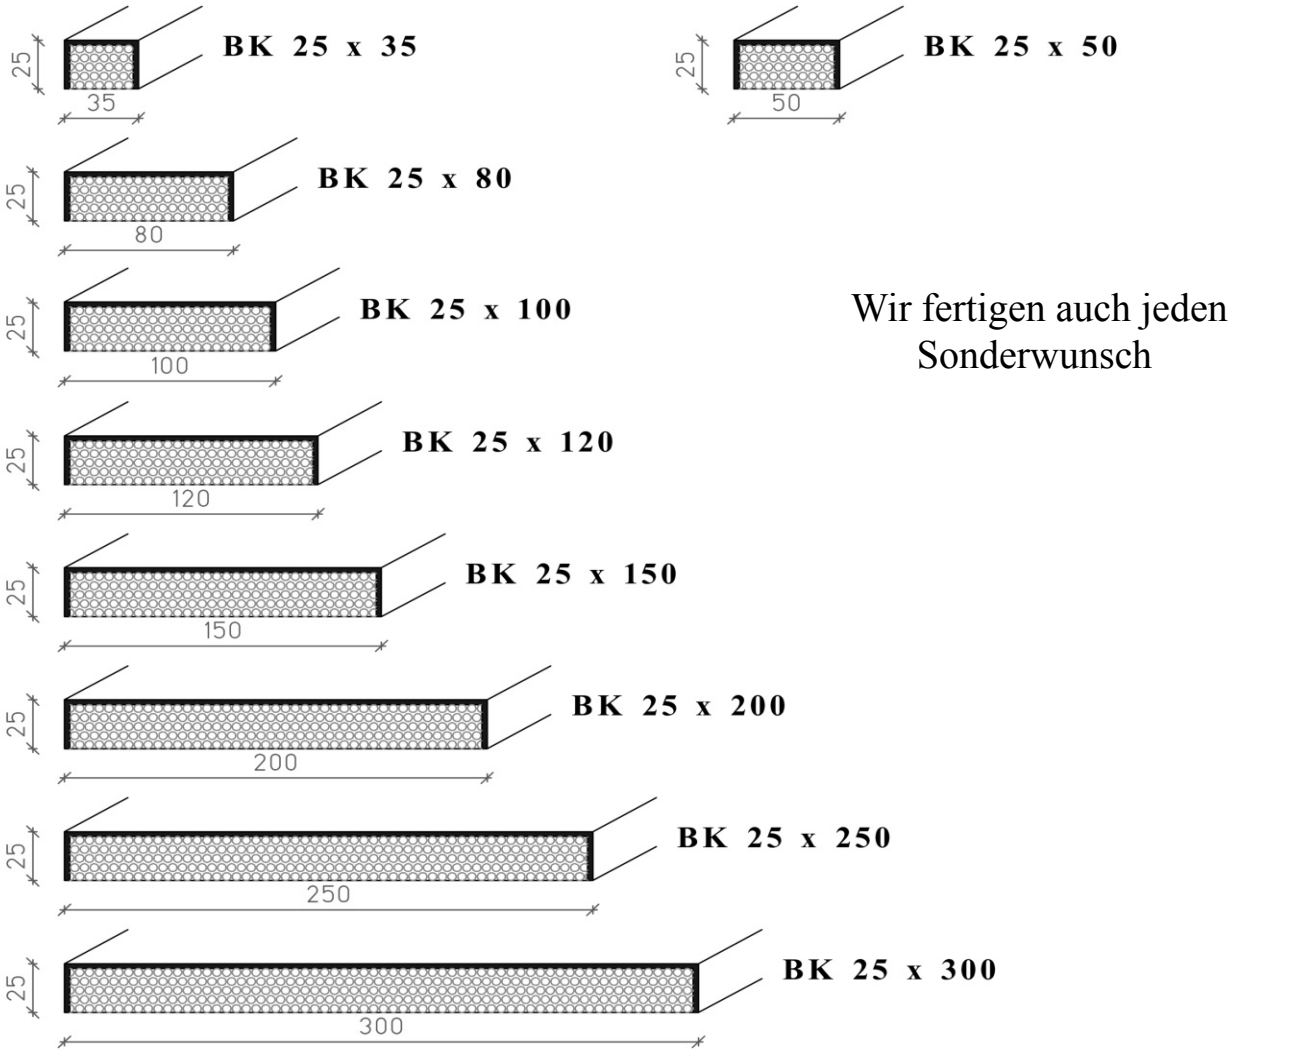

Gussteile müssen zusätzlich zum Klebemörtel am tragfähigen Untergrund verschraubt werden.

Große Gussteile sind auf Grund Ihres hohen Gewichtes nur mit spezieller Unterkonstruktion für Wärmedämmverbundsysteme geeignet.

Brettprofile mit Kante

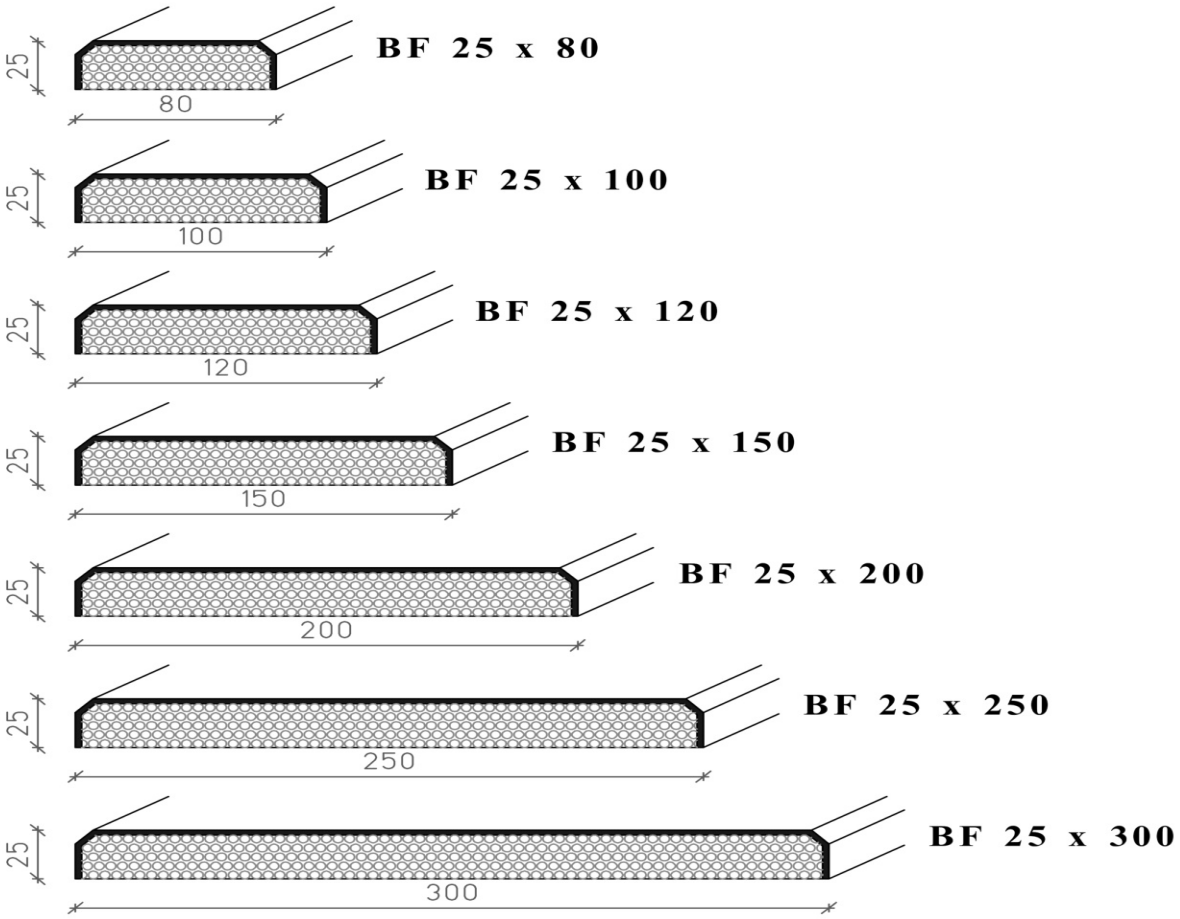

Brettprofile sind die einfachsten Arten von den Fassadenprofilen

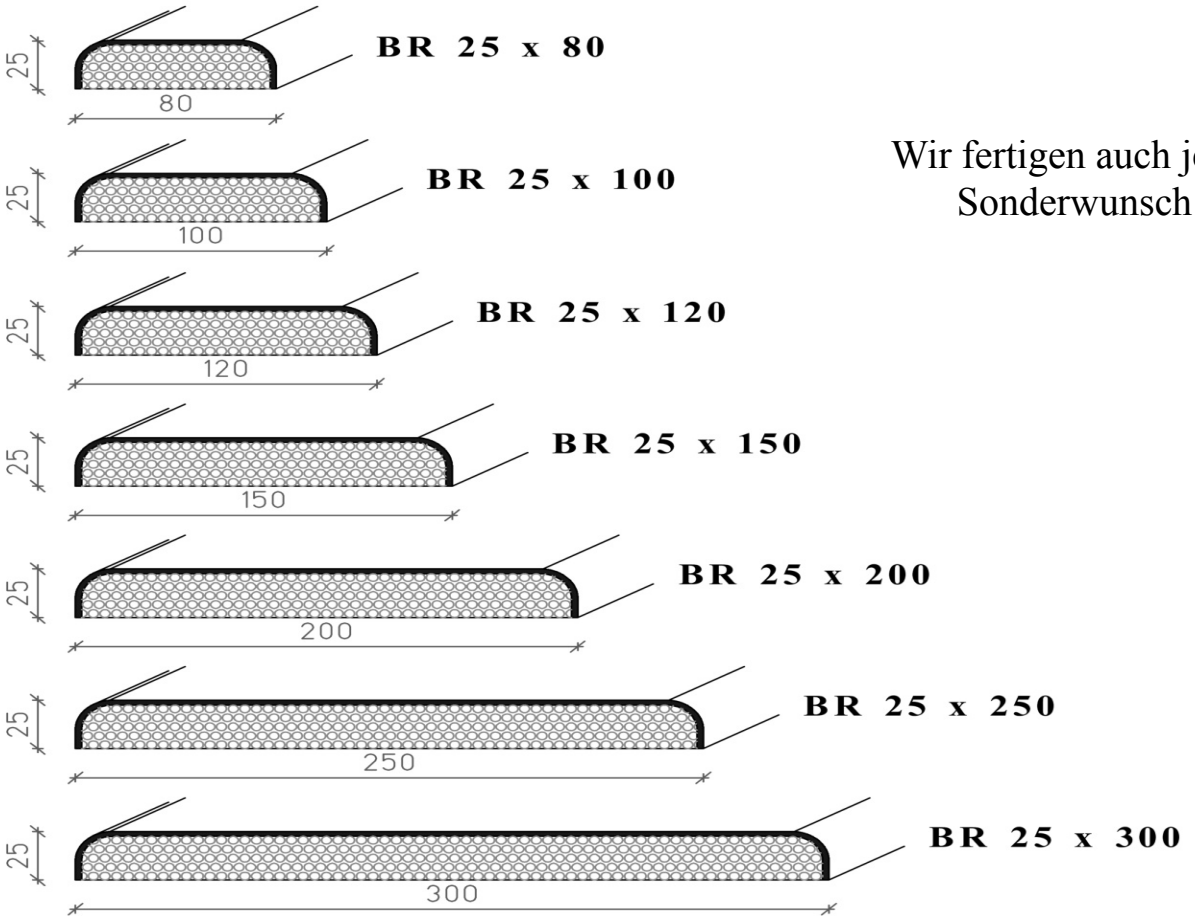

Wir fertigen auch jeden Sonderwunsch

Brettprofile mit Fase

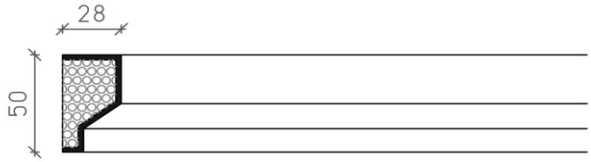

Brettprofile mit Rundkante

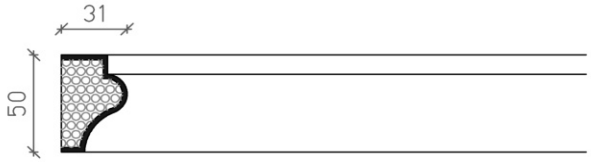

Wir fertigen auch jeden Sonderwunsch
